

FOR PROFESSIONAL LANDSCAPERS · HADAA.APP

THE #1 AI LANDSCAPING PLATFORM

A faster way to design landscaping—so clients see it, crews build it, and you win more work.

Hadaa turns a photo, a drone shot, or a sketch into photorealistic designs, an accurate site map, and a contractor-ready blueprint—in under two minutes. Your clients see the vision, your crew gets a plan they can actually build, and you take on more projects without adding hours.

WHITE-LABEL EXPORT

"We're changing how landscaping gets designed—faster from idea to buildable plan, so landscapers win more jobs and take on more of them."

— One backyard, one Hadaa session

REAL CLIENT PROJECT

From the same drone shot: a **sunken firepit lounge**, **circular water feature**, **tiered flower beds**, **pergola kitchen**, **play area** and **landscape lighting**—placed to scale and rendered photorealistically.

— How a job runs on Hadaa

STEP 1

Map the site

Have a **drone shot**? Add it. No drone? Send up to **14 ground-level photos** and Hadaa constructs the aerial for you—then builds an accurate area map of the real plot, with boundaries and footprints, to design on.

STEP 2

Render your vision

Upload a **sketch of the garden you have in mind** and Hadaa renders it photorealistically—or let it propose up to 22 finished designs from the site alone.

STEP 3

Perfect every detail

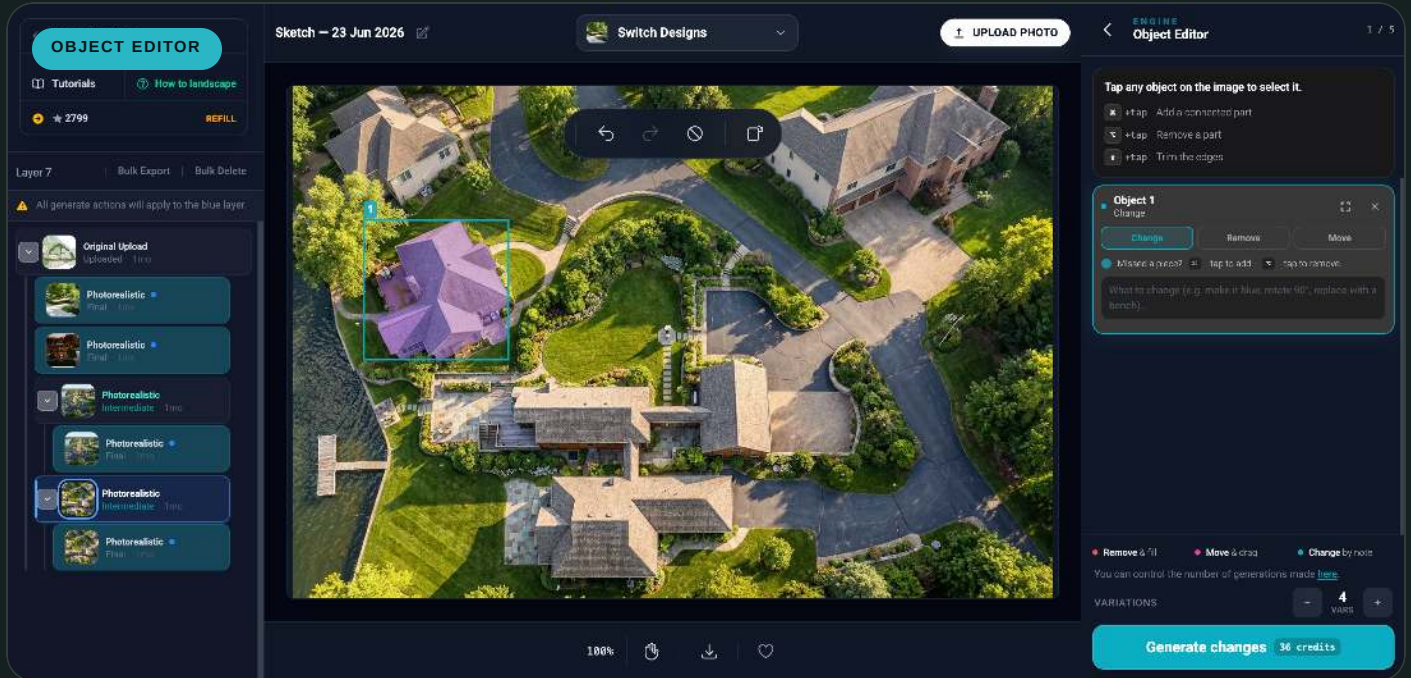

Move or remove anything with the **Object Editor**; change a plant, material or mood in plain words with **Smart Fix**. No redraws, instant in the browser.

STEP 4

Deliver the plan

Export a colour-coded **contractor blueprint** and a **branded landscaping guide**—plants, quantities and costs, under your own logo.

Tap any object to change, remove or move it—then generate variations.

Layers, engines and precise click-to-edit control, all in the browser: select the house, a flower bed or a path and edit just that element from a plain-language note—the rest of the scene stays exactly as it was.

What changes for your business

Weeks of work, done in minutes

Idea to a buildable, photorealistic design in under two minutes. Turn proposals around the same day and keep every project moving instead of waiting weeks on a studio.

Clients see it before they commit

Photorealistic visuals of the client's own space build trust and earn a yes—so you win more of the jobs you bid for, not just the ones you talk through.

Take on more work

The engines do the heavy design lifting and every plan is build-ready, so the same team handles more clients and bigger pipelines—without more late nights.

Questions landscapers ask

I've got site photos—how do I get designs?

Upload 4–14 photos (one per corner works). Hadaa builds an accurate **aerial area map**, generates 6 full redesigns, then up to **22 images** across angles and seasons—in minutes.

How do I refine a design before I send it?

The **Object Editor** moves or removes anything (the space fills in cleanly) and **Smart Fix** changes a plant, material or mood from a plain-language note—no redraws, in the browser.

Can I design the garden I already picture?

Yes. Sketch it—napkin, rough layout or CAD export—add a one-line brief, and Hadaa **renders exactly what you drew**, then re-shoots it from multiple angles. It won't reinvent your intent.

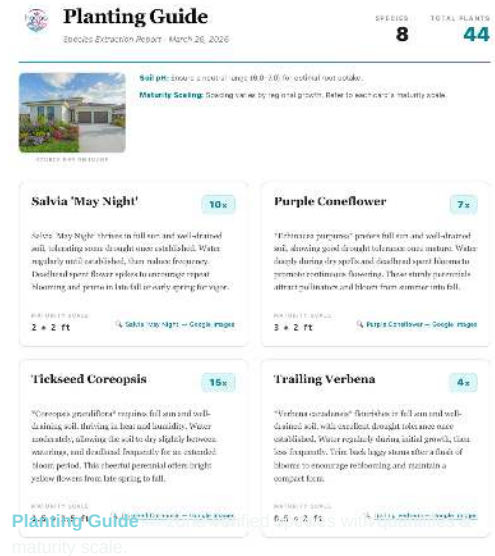

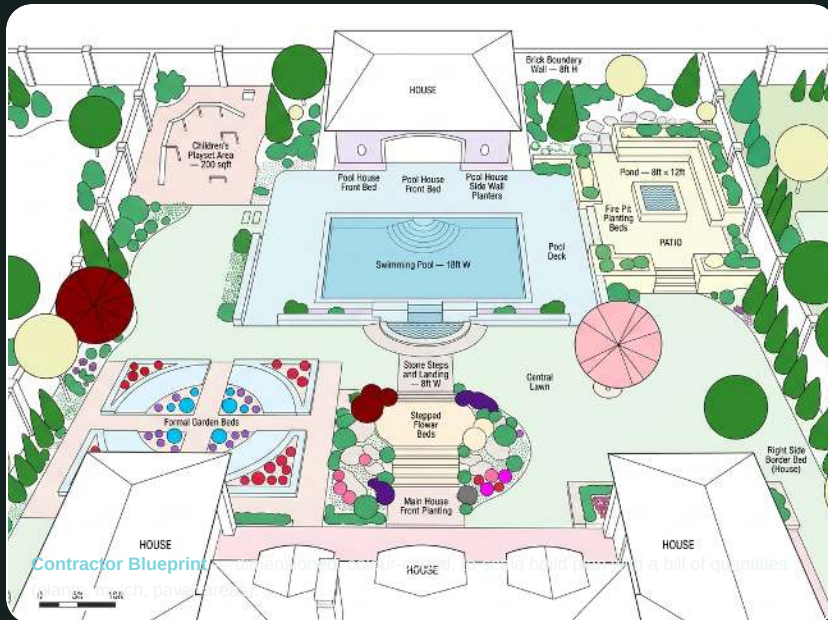

Will the plants survive—and can I brand it?

Every plant is checked against the client's **USDA zone**, rainfall and sun before it appears. Export the blueprint, planting guide and bill of quantities as a **white-label PDF** under your own logo.

What you hand the client

EVERY PROJECT · WHITE-LABEL PDF

Not inspiration—a buildable package. Every render comes with the documents a contractor and a client actually need, exportable under your own brand.

Plans for professionals

NO LOCK-IN · CANCEL ANYTIME

Project Pass

\$59 one-time

Everything to design and deliver a single project.

- ✓ Full Project Studio — all manual engines
- ✓ Sketch engine, blueprints & planting guides
- ✓ A personal onboarding call
- ✓ Project credits · 90-day access

MOST POPULAR

Studio

\$39/mo

For pros who design gardens for a living.

EVERYTHING IN PROJECT PASS, PLUS

- ✓ Fresh monthly credits that roll over
- ✓ 4K ultra renders
- ✓ Unlimited blueprints & planting guides
- ✓ Priority queue & white-label exports

Enterprise

Custom

A distinct design language & a growing client base.

EVERYTHING IN STUDIO, PLUS

- ✓ Private engine trained on your portfolio
- ✓ Your signature style, every render
- ✓ Team seats & volume
- ✓ Dedicated support

GET A PROFESSIONAL DEMO

See it on one of your own sites.

Reply to this note and I'll set you up with a professional demo—send a site photo (a drone shot is even better) and we'll turn it into an area map, renders and a contractor blueprint so you can judge it on real work.
